Objective of the Committee	:	<p>Help clubs to set up internet groups and website.</p> <p>It was found that there was no specialized communication set-up which directly linked the district chairs of various committees with the club directors who are doing the actual implementation of various projects. Therefore for the first time egroups have been created according to each avenue of service.</p> <p>Create an effective Website for the district with extensive details of the district administration and programs.</p> <p>Co-ordinate with Dist Secy Communications and Publications for maintenance of 14 egroups and creation of district website.</p>
What Clubs should do	:	<p>The present world has no geographical boundaries as far as information exchange is concerned. Several thousand computers are connected to each other across the Web through Internet. This has made communication real fast using broad band (2 MBPS and more). E-mails can be sent to all Club members reducing paper usage (Saving environmental damage). Club Website also helps communicating to all members and display projects information and photos.</p>
